Professional Summary

Computer Science student focused on DevSecOps, automation, and cloud-based software delivery. Background in Full-Stack development with React and modern web technologies, with growing experience in CI/CD pipelines, MLOps, and AI-driven operations. Interested in building secure, scalable, and production-ready systems.

Experience

DevOps Intern

Dec 2025 – June 2026

- Built and maintained Infrastructure as Code (IaC) using Terraform to automate cloud resource provisioning.
- Worked with Microsoft Azure services to deploy and manage cloud infrastructure.
- Collaborated with developers to improve deployment reliability, security, and release efficiency.

Skills

Languages: Python, Java, JavaScript, SQL, C.

Web: HTML5, CSS3, React, Tailwind CSS, REST APIs.

Cloud & DevOps: Azure, Terraform, CI/CD.

Tools: Git, GitHub, MongoDB.

Coursework: DSA, DBMS, OOPs, Computer Networks.

Education

B.Tech, Computer Science & Engineering — PSIT, Kanpur

2022 – 2026

- **Percentage:** 75.15%

Projects

Smart Agriculture System

Apr 2025 - June 2026

- Developed an IoT-based smart irrigation system utilizing, Node MCU , DHT11, soil moisture sensors, and float sensors for automated water management.
- Revamped existing irrigation systems by integrating microcontroller-based circuit connections, resulting in enhanced operational control and a significant decrease in overall water wastage.
- Stack: Node MCU, IoT Hardware Integration, Sensor-based Automation, Circuit Design.

Deep Packet Inspection Engine

Jan 2026 - May 2026

- Designed and built a CLI-driven network monitoring tool with automated packet filtering, custom security rules, and real-time IP/domain blocking.
- Successfully tracked and classified encrypted HTTPS traffic for **16+ services with 100% accuracy during testing.**
- Stack: Python, TCP/IP, DNS, TLS/SSL, PCAP, CLI.

Crop Recommendation System

Oct 2024 - Dec 2024

- Built a machine learning system to recommend optimal crops based on soil, climate and environmental parameters.
- Achieved **92% prediction accuracy** using Scikit-learn and Pandas on 10,000+ sample records.
- Stack: Python, Pandas, NumPy, Flask.

Certificates

- Machine Learning Specialization (DeepLearning.AI) by Coursera.
- HackerRank Python basics Certificate.
- HTML5, CSS3, Javascript by Infosys Springboard.

Achievements

- Achieved 5-Star rating on HackerRank for algorithms, ranking among top performers.
- Consistently solved over 300+ problems on LeetCode and other programming platforms, improving analytical and programming efficiency.
